

# Apprenticeship Job Description

## **Job Title - Lifting Technician**

### **Job Purpose**

Lifting Technician will set up and operate crane to lift and place a variety of loads in the workplace. They will play a vital role by supporting site project in which they will have responsibility for operating the crane to lift materials and equipment to designated work areas on a construction site. The candidate will be signed up with the College/Training provider. The candidate will be trained on site by the competent trainer. The assessor will be visiting the site to check the progress and evaluate the apprentice. The Lifting Technician will need to be able to interpret and comply with given contract information and work with the lifting team to carry out lifting activities.

### **Responsibilities and Duties**

- Comply with relevant legislation and official guidance (including the Health and Safety at Work Act, Lifting Operations Regulations 1998 and BS 7121) when lifting and transferring loads.
- Confirm with manufacturer's and the employer's operational and health and safety requirements.
- Identify the sequence of lifting operations to be carried out, communicate and organise the work with others.
- Undertake all pre-use checks, configure and set the crane for lifting duties.
- Programme/set-up and conform with the crane's electronic information systems.
- Lift various loads using up to the full radius and slewing capabilities of the crane.
- Accurately place load whilst minimising the swinging of loads and following signals and instructions.
- Maintain stability and safe working situations.
